

PURPOSE

Identifying Clear Goals

Identifying Clear Goals

27%

of RB respondents lacked clear goals

91%

of people with **high levels** of resilience had clear goals

66%

of people with **average levels** of resilience had clear goals

16%

of people with **low levels** of resilience had clear goals

The Importance of Setting Goals

"I can accept failure,
everyone fails at something.
But I can't accept not trying."

Michael Jordan

Research on goal setting has consistently shown that setting specific, challenging goals leads to better performance compared to vague or absent goals.

Locke and Latham's Goal Setting Theory

At an Individual Level

Psychologists have proven that people with clear, ambitious goals tend to be more motivated, persistent, and effective in their tasks.

Goal specificity, difficulty and self-efficacy are critical in achieving high performance.

Latham and Locke (1979)

In studies, participants with specific goals outperform those with no goals.

Locke and Bryan (1969)

At a Group Level

Studies have shown that groups with specific, challenging goals consistently outperform those with vague or no goals.

Groups given clear objectives work more cohesively, exert greater effort, and achieve better results than those without defined goals.

Locke and Latham (1982)

Goal setting enhances focus, motivation, and persistence in group tasks.

Latham and Baldes (1975)

How Do We Set Goals? – The SMART Methodology

The SMART methodology is a framework for setting and managing goals, designed to ensure that objectives are clear, actionable, and achievable.

- **SMART** stands for **Specific, Measurable, Achievable, Relevant, and Time-bound**, each of which adds a layer of clarity and structure to the goal-setting process.
- **SMART Goals** are especially effective when there is a need for precise direction, measurable outcomes, or time-sensitive projects, such as completing a work project, improving fitness, or learning a new skill.
- **SMART Goals** are employed across any area where goal setting is crucial to achieving success.

 Advantages of SMART goals	 Disadvantages
Increased clarity and focus	Rigid structure may limit creativity and innovation
Measurable Progress	Focus on the outcome rather than the process may result in a lack of intrinsic motivation
Higher motivation	Time-bound nature may create pressure and stress
Improved decision-making	Short-term focus may disregard long-term vision
Greater Accountability	Overemphasis on Metrics
Higher success rate	Lack of adaptability to changing circumstances

Due to these disadvantages, it is necessary to have alternative goal setting methods bespoke to each situation.

How Do We Set Goals? – The GROW Methodology

The GROW model is often used in coaching and personal development which focuses on reflection and understanding.

- **GROW** stands for **Goal, Reality, Obstacles,** and **Will.**
- The framework focuses on the process rather than outcome and encourages users to consider the whole situation not just the goal itself. Ideal for situations where adaptability, creativity, and personal insight are key to achieving success.

G

GOAL

What do you want to achieve?
Where do you want to get to?

R

REALITY

Where are you now?

O

OPTIONS

What could you do?

W

WILL

What will you do?

Advantages of the GROW model over SMART goals

Greater Flexibility- No strict timelines or tightly defined measurable outcomes. Ideal for dynamic evolving long-term goals.

Focus on Self-Reflection and Insight- Leads to better informed and more realistic goal setting.

Emphasis on creativity and problem solving- Allows solution-based thinking which is beneficial when the path to a goal isn't clear.

Promotes Ownership of Actions- Individuals are empowered to come up with solutions themselves in determining how to achieve their goals.

Encourages Reflection and Adaptation- Emphasises continuous reassessment of goals.

Encourages Long-Term Thinking- model supports longer-term, evolving goals that may require continual adaptation and deeper understanding.

Identifying Clear Goals

EXERCISE 1

How to Set a SMART Goal

This framework shows the 5 key characteristics of a smart goal. Try creating your own SMART Goal following this methodology.

SPECIFIC

The goal should be clear and unambiguous

What exactly do I want to achieve? Why is this Goal important?

MEASURABLE

The goal has clear criteria to track progress and determine when the goal is achieved

How will I know when the goal is accomplished?

ATTAINABLE

The goal must be realistic and attainable given the current resources and constraints

Can I achieve this goal, or is it too ambitious?

RELEVANT

The goal is meaningful and helps you to achieve broader objectives

Is this goal worthwhile? Does it align with my other goals or values?

TIME-BOUND

The goal has a deadline or timeframe for completion

When do I want to achieve this goal?

Which of the following goals are SMART?

1. I want to exercise for 30 minutes, five times a week, for the next 3 months to improve my fitness and overall health.
2. I want to be more productive.
3. I want to increase my sales by 20% within the next year.
4. I want to increase my productivity by completing five important tasks each week for the next month.

Identifying Clear Goals

EXERCISE 2

How to Set a GROW Goal

Following this framework, is there a specific area of personal development or goal at work you wish to apply this methodology to?

GOAL

Setting clear & specific goals

What do you want to achieve?

What does success look like?

How will you know when you have achieved your mission?

Is the goal SMART?

REALITY

Assessing the current situation & identifying obstacles & challenges

Where are you right now?

How does the current situation make you feel?

What are the current challenges you are facing?

What are your strengths and weaknesses related to this goal?

OPTIONS

Paths the person or group can take towards the goal

Can I achieve this goal, or is it too ambitious?

What could you do?

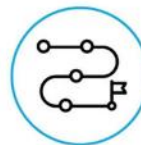

How can you overcome the obstacles you face?

What options or strategies can help you achieve your goal?

What will help you succeed? (consider any support or resources you may need)

WILL

Commitment to concrete & achievable actions

What will you do?

What actions will you commit to taking?

When will you start & do you have a deadline?

Which tasks need to be completed to achieve the goal?

How will you stay accountable and on track?
