Seeking Feedback

Regular, constructive feedback is key to developing a resilient mindset.

Enhances Self-Awareness

Provides insights into personal strengths and areas for improvement.

Encourages reflection and self-discovery.

Facilitates Learning & Growth

Identifies what is working effectively and what needs improvement.

Promotes skill, development and knowledge expansion.

Supports Adaptability

Offers datapoints to refine strategies and approaches.

Encourages flexibility in dealing with unexpected challenges.

Boosts Confidence & Motivation

Positive feedback reinforces achievements and efforts.

Constructive feedback fosters a growth mindset and perseverance.

Improves Emotional Regulation

Helps understand and manage emotional reactions to stress.

Builds emotional intelligence and coping mechanisms.

Importance of Feedback

The Johari Window Model

The model is based on 2 basic concepts;

Trust can be built by revealing information about yourself to others.

You gain unknown and often insightful information about yourself from the feedback you receive from other people.

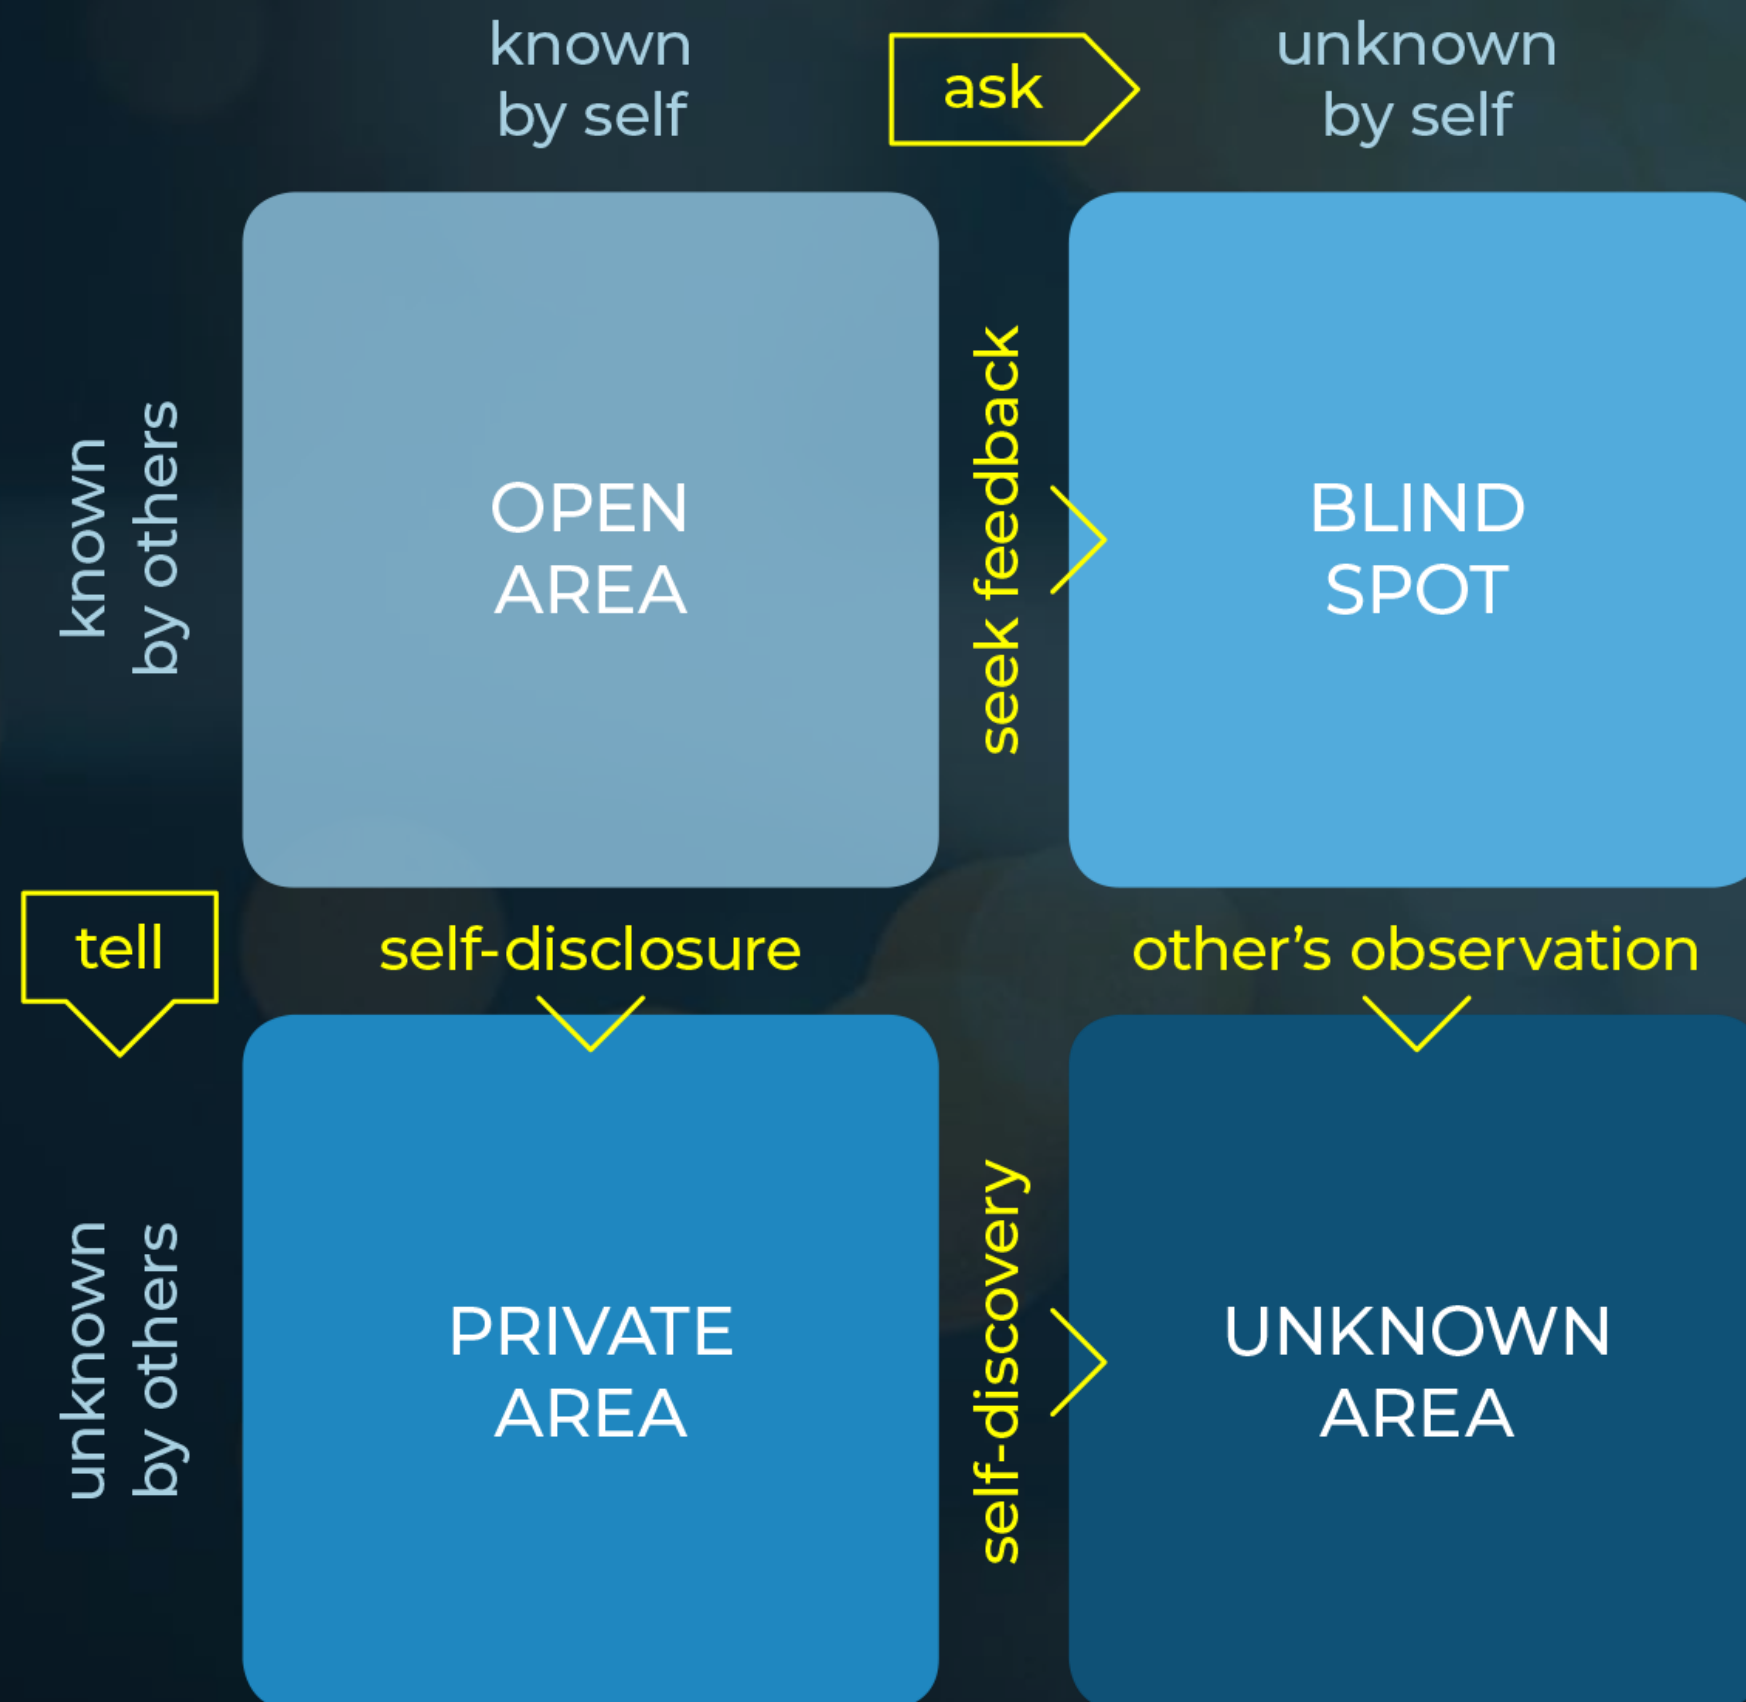

EXERCISE

ACTIVELY SHARE

Share information about yourself with colleagues to expand their understanding – be vulnerable.

Ask them to share feedback on how they see you, your strengths, weaknesses and other insights.

1955 Joseph Luft and Harrington Ingham

Giving Feedback

Best Practice

BE PROMPT

Deliver feedback in the moment or shortly thereafter.

PLAN

Plan your feedback in advance.

BE CLEAR & CONSTRUCTIVE

Be clear and concise and be constructive rather than negative or personal.

OBSERVE

Be aware of non-verbal clues.

SHARE

Let others see/hear the positive feedback – in meetings, via email etc, it will have a broader motivational impact.

LINK IT TO IMPACT

Link praise to impact- let them know how their work is contributing to the success of the team.

RECOGNISE

Remember, a simple 'thank you' for a job well done goes a long way.

Receiving Feedback

Best Practice

ASK

Ask for feedback on a regular basis.

BE POSITIVE

Assume the person giving the feedback is acting with best intent.

CLARIFY

Clarify feedback where necessary.

BALANCE

Don't just focus on the 'negative', take on board the positive.

ACCEPT

Don't be defensive or attempt to explain or justify yourself.

SHOW APPRECIATION

Thank the person giving the feedback.

REFLECT

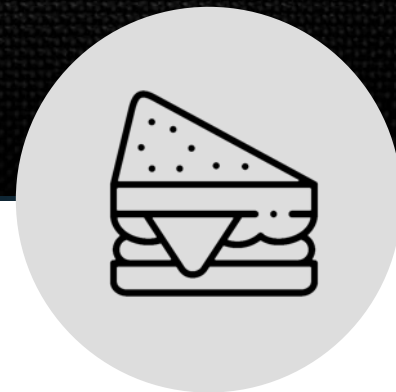

Reflect on the feedback and think how you could do things differently next time.

TAKE OWNERSHIP

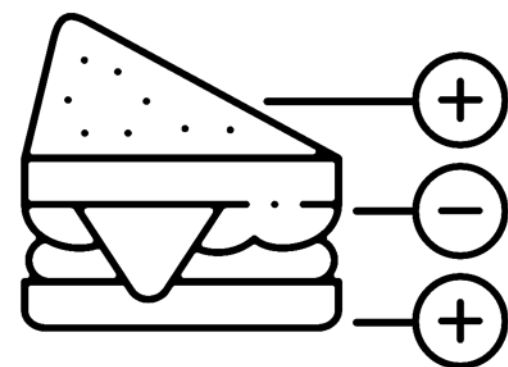

Take ownership of your mistakes and learn from them.

Feedback Models

FEEDBACK SANDWICH

‘Sandwich every bit of criticism between two heavy layers of praise’ –Mary Kay Ash

PENDLETON MODEL

Learner-centred discussion with emphasis on an action plan or goals;

‘What do you think went well?’

‘What do you think could be done differently?’

‘How can this be achieved?’

360° FEEDBACK

Feedback is obtained from an employee's manager, peers and team, (and sometimes customers or partners) together with a self-evaluation by the employee.

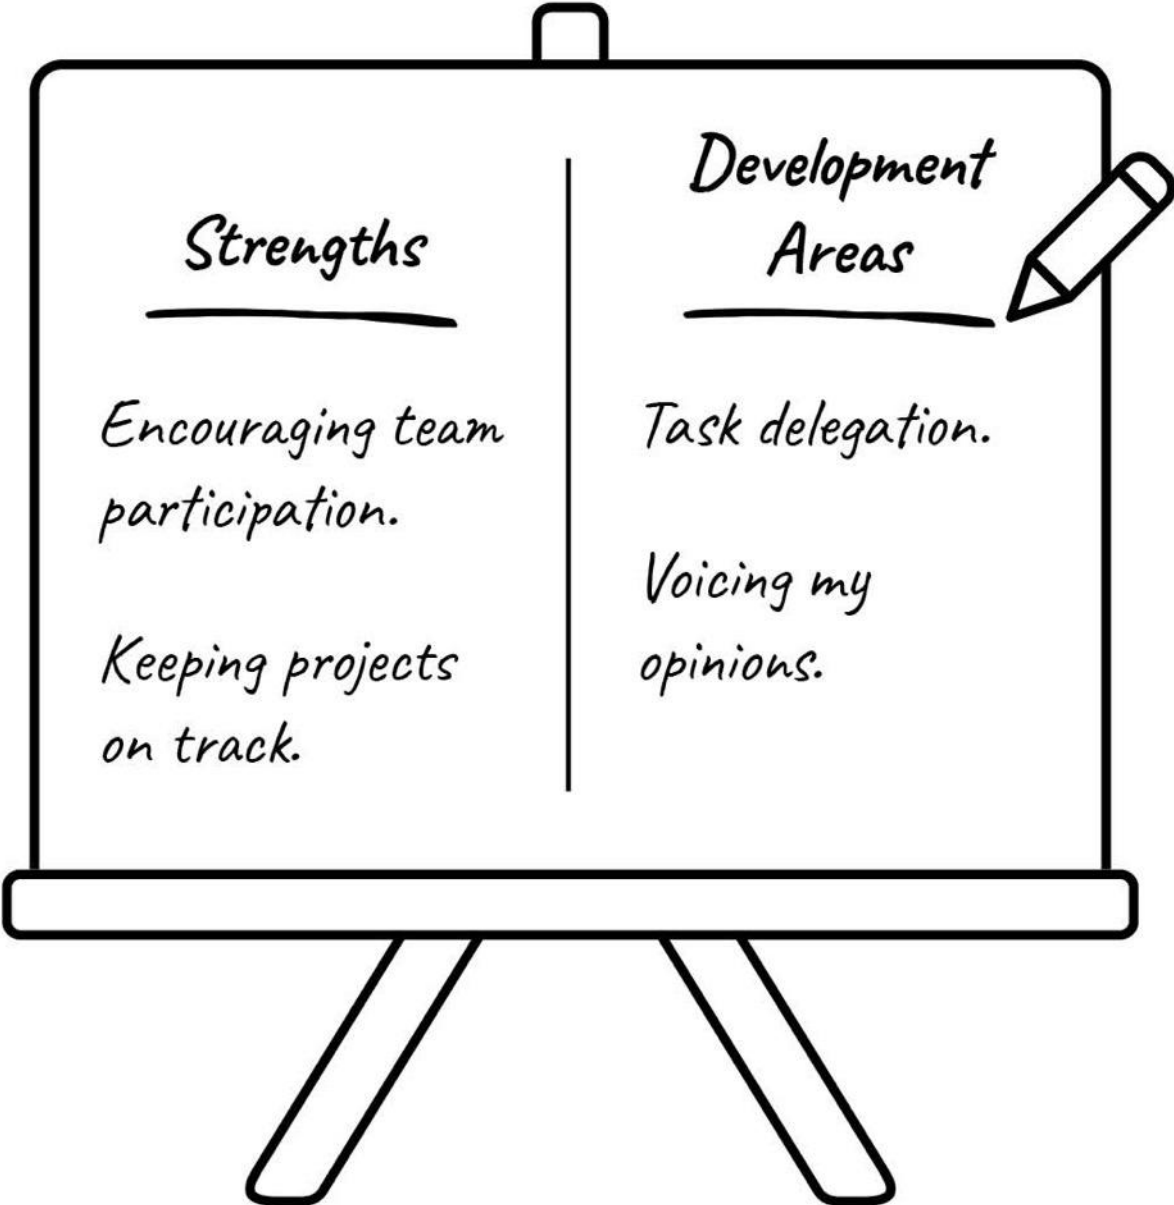

The output helps the employee identify potential areas for personal development and improvement.

Seeking Feedback

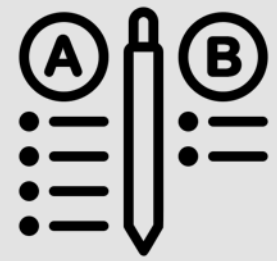

EXERCISE 1 Johari Window Group Exercise

This exercise helps team members identify their strengths and development areas through peer feedback. Each participant shares their self-assessment, receives feedback from the group, and commits to working on one area for improvement.

- 1 Each team member begins by writing down two strengths and two development areas. (5 minutes)
- 2 One member then stands in front of the group, draws two columns on the whiteboard labeled “strengths” and “development areas,” and writes down their own strengths and areas for improvement.
- 3 The team member briefly explains these strengths and development areas to the group.
- 4 Next, the rest of the team provides feedback, suggesting additional strengths and areas for improvement they observe. The team member records all feedback on the whiteboard in the appropriate columns.
- 5 At the end of their turn, the team member reviews the feedback and commits to working on one development area.
- 6 Another team member then takes their turn to receive feedback.

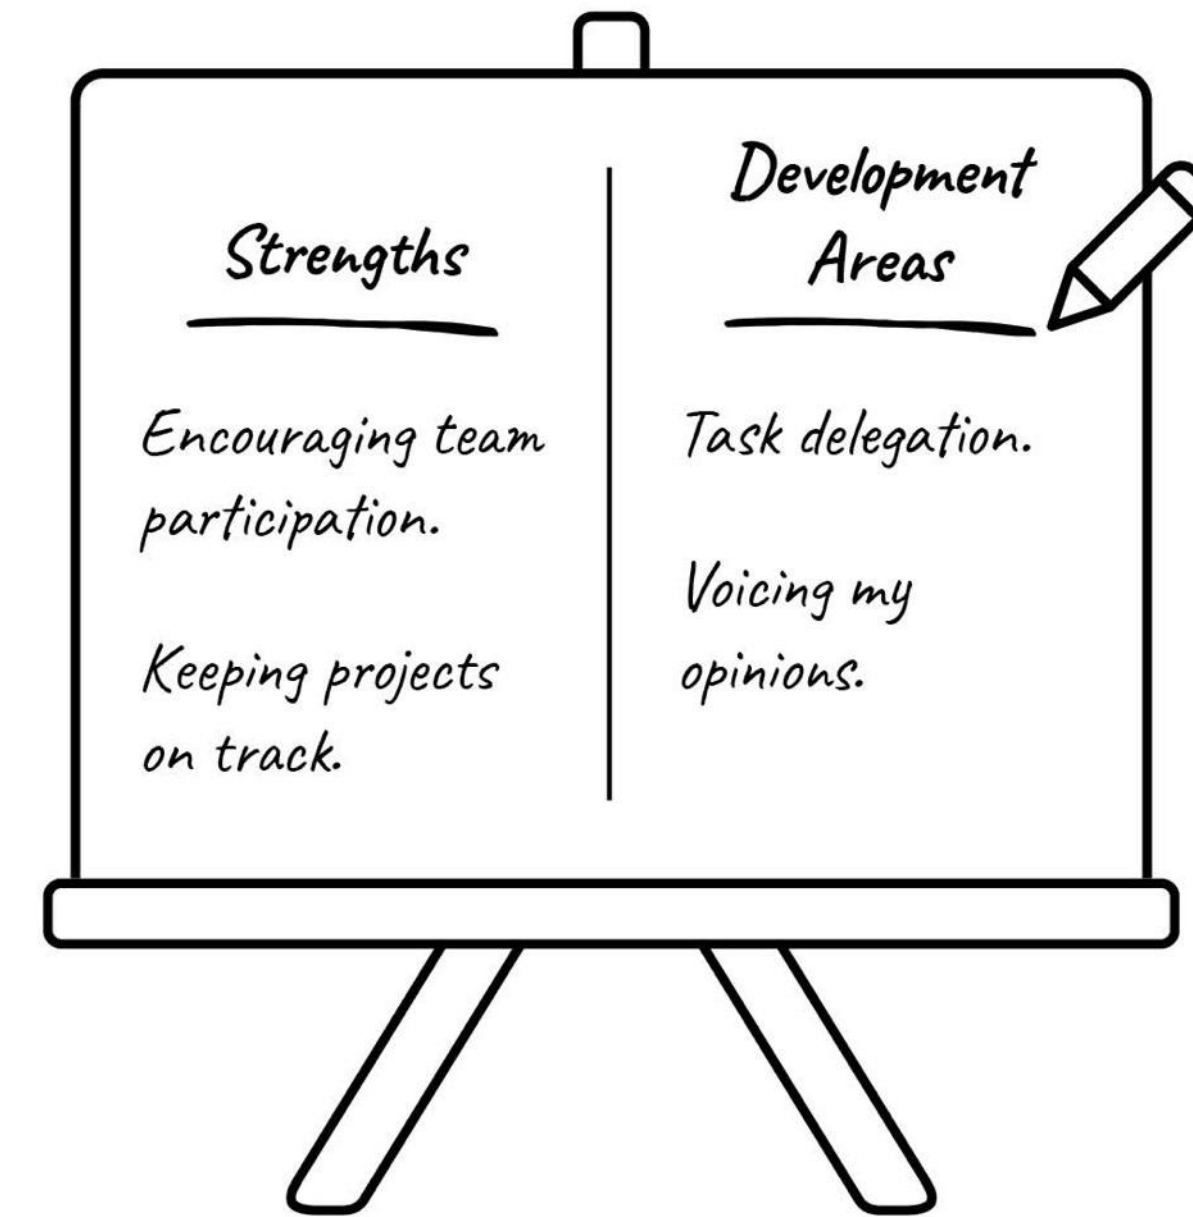

Seeking Feedback

EXERCISE 1

Johari Window Group Exercise

This exercise helps team members identify their strengths and development areas through peer feedback. Each participant shares their self-assessment, receives feedback from the group, and commits to working on one area for improvement.

Guidance for receiving feedback

- For the person receiving feedback, listen carefully and write down the feedback you receive on the whiteboard.
- Do not try to explain or become defensive.
- Thank the person for the feedback and move on.
- Assume 'good intent' on behalf of the person giving feedback
- Don't forget, feedback is a gift as it helps us learn things about ourselves that we may not have been aware of.
