

MENTAL STRENGTH
Perseverance

Perseverance

4x

People with high levels of resilience are 4x more likely to persevere when faced with a challenge than those with lower levels of resilience

Perseverance

PERSEVERANCE – “Persistence or continued effort in doing something despite difficulty, opposition, failure or delay in achieving success.”

Perseverance is an essential component of resilience and requires effort, practice and an ability to learn from failure, and to try again.

Perseverance is a continuous drive to reach our goals and improve our skills and performance through persistent effort.

It is closely aligned with purposefulness and goal-orientation and is fuelled by passion.

THOMAS EDISON

Thomas Edison, inventor of the electric lightbulb, failed thousands of times before being successful. For him, understanding what did not work and why, was simply part of the process of finding out what did work.

“I have not failed; I’ve just found 10,000 ways to make a lightbulb that won’t work.”

Perseverance

Why do people find it hard to achieve their goals/complete a challenging task?

Why do people find it hard to achieve their goals/complete a challenging task?

- Perceived as too difficult
- Self-doubt/negative thoughts
- Lacking the necessary skills
- The desire for instant results without hard work
- We give up too easily
- We are discouraged by the negativity of others
- We do not have clear goals or a purpose

Perseverance

Why do people find it hard to achieve their goals/complete a challenging task?

What impact does this have on a personal level?

Why do people find it hard to achieve their goals/complete a challenging task?

- Perceived as too difficult
- Self-doubt/negative thoughts
- Lacking the necessary skills
- The desire for instant results without hard work
- We give up too easily
- We are discouraged by the negativity of others
- We do not have clear goals or a purpose

What impact does this have on a personal level?

- Our resilience
- Our self-confidence
- Our self-esteem
- Our relationships
- Our ability to bounce back from challenges and adversity

BEST PRACTICE

Developing Perseverance

Have a 'Growth Mindset' not a 'Fixed Mindset.'

Learn from failures – see failure as a learning opportunity.

Be Adaptive – be flexible to changing circumstances and conditions.

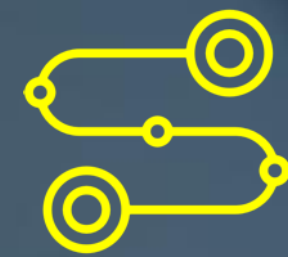

Don't lose sight of the goal.

Be prepared for the Inner Critic – by challenging unsubstantiated self-doubt and insecurity.

Focus your energy and resources on things in your control.

Have short and long-term goals and set benchmarks along the way to reward and encourage progress.

Build a Support Network to give encouragement and feedback when things get tough.

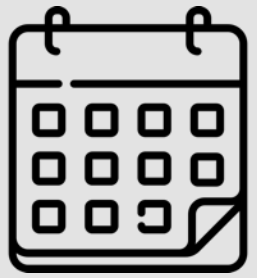

Prepare for challenges – things rarely go smoothly.

Take risks – you will expose yourself to more difficult situations and will learn to adapt and grow.

Perseverance

EXERCISE 1

One-month Challenge

For the one-month challenge, select something that you would like to achieve personally or professionally that could be achieved in one month. An area that is challenging but achievable and something that you may be putting off or have tried before but gave up along the way.

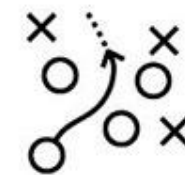

After one month of daily practice, you will see concrete improvements and form a lasting habit.

Start by defining the goal and break it down into milestones along the way.

Commit to working on it every day for 30 days irrespective of how you are feeling or other demands on your time.

Anticipate the challenges you may encounter along the way and think through some alternative strategies in advance.

Make sure that the relevant people in your support network are aware of what you are doing so that you can turn to them for support and encouragement if needed.

Reframe negative thoughts and go to your 'Success Bank' if things get tough to remind yourself of past successes.

Celebrate every milestone.

Keep a written record of progress and how you are feeling on a daily basis.

Learn from setbacks and apply the learnings going forward.
