5. ResilienceBuilder Certification Training Session 2 Guidance Notes

Appendix A: ResilienceBuilder Certification Materials

## **1. Introduction**

The ResilienceBuilder Certification Train the Trainer Guide is intended to be used by Certified ResilienceBuilder Coaches who are authorised to provide Certification Training to coaches and facilitators.

This guide covers the curriculum and content of the 2 x ½ day ResilienceBuilder Certification sessions and should be used in conjunction with the materials outlined in Appendix A of this document.

## **2. ResilienceBuilder Certification Training**

ResilienceBuilder Certification Training is a 2 x ½ day course (4 hours per session) and provides the coach with all of the information and materials required to provide 1:1 coaching and group workshops using the ResilienceBuilder Assessment tool.

ResilienceBuilder Certification Training is typically provided on a 1:1 basis or in small groups and delivered virtually.

Following the Certification Training, the Coach will be able to download a 'ResilienceBuilder Certified Coach' digital badge onto their LinkedIn profile.

### **3. Certification Training – Course Overview**

Outlined below is the content for each session of the ResilienceBuilder Certification Training.

#### **Session 1**

- Introduction
- Background to ResilienceBuilder
- ResilienceBuilder Assessment Tool Overview
- Assessment Tool Questions and Methodology
- ResilienceBuilder Assessment Report
- 1:1 Coaching Session Format
- Target Market & Marketing Materials

#### **Session 2**

- Delivering a Group Workshop
- Workshop Objectives and format
- Delivering a workshop
- Data Analysis
- Focus Area Materials
- Follow on activities.
- Administration
- Trademark, Copyright and Branding

#### 4. ResilienceBuilder Certification Training Session 1 Guidance Notes

---

##### **Session 1 Materials:**

- *ResilienceBuilder Certification for Coaches and Facilitators Session 1 Final 24*
  - *Strong Assessment Report*
  - *Emerging Assessment Report*
  - *Developing ResilienceBuilder – a research-based approach.*
- 

##### **Preparation**

Prior to session 1, the coachee will receive a link to download the above materials. Make sure that you have the documents to hand so that you can reference and share them during the training session.

Check that the coachee has downloaded the documents at the start of the session and briefly explain what they cover.

##### **Materials : ResilienceBuilder Certification for Coaches and Facilitators Session 1 Final 24**

For Session 1, you will mainly be using the above set of slides throughout the training and these guidance notes will follow the sequence of slides accordingly.

##### **Introduction**

During the introduction, this is a great opportunity to highlight your passion for helping others and in particular what led you to become a resilience coach and trainer.

**Tell your story** and the resilience journey you have been on. Why it's so important to you and what impact you are having on individuals and teams to help them cope better with stress and adversity at work and at home.

**Ask the coach(es) their story.** What motivated them to become a resilience coach, What plans do they have once certified.

##### **Slide 2 Agenda Session 1 and Session 2**

- Explain the content for Session 1 and Session 2.
- Session 1 focuses on the Assessment Tool and Report and how to use the report for 1:1 coaching.
- Session 2 focuses on Group workshops, how to deliver them, data analysis and the materials that are available to support you.

- Highlight the fact that we prefer to train 1:1 or in small groups to make the experience better for the coachee, enabling them to ask questions freely to get the most from the training.
- Encourage them to ask any questions at any time during the training session.
- Confirm that there will be a break during the training session, allow 10-15 minutes.

### **Slide 3 Background**

#### **Founder's Story**

You may want to share my story in terms of my background and what led me to develop ResilienceBuilder, so here is a summary that you can use below;

Steve Howe is the Founder of ResilienceBuilder and following a 40-year career in the technology industry, where he held senior positions in companies such as Hewlett Packard Enterprise, he started his own coaching and consulting business focused on helping leaders and teams.

It was during one of his client engagements that he recognised the increasing challenges that people faced in the workplace leading to stress, illness and burnout and wanted to understand more in terms of why some people were better able to cope than others.

Three years later, following extensive research combined with his own experiences, he developed the ResilienceBuilder model, a holistic approach to resilience which looks at resilience across 5 different facets: Mental Strength, Purpose, Physical Stamina, Emotional Intelligence, and Social Support.

Based on the model, the ResilienceBuilder Assessment Tool and Personalised Report was developed to provide individuals with an indication of their current level of resilience with specific recommendations for further development. This is being used for one-to-one coaching and team/group workshops where common challenges are identified and worked through using the aggregated data.

Steve's mission is to help individuals and teams become more resilient and be better prepared to deal with challenges and setbacks but also to work with organisations to ensure that they create the right environment for people to thrive.

#### **Optional – Developing ResilienceBuilder**

Depending on the audience, you may want to briefly share how we developed ResilienceBuilder by walking through the material below. I would recommend picking out a few specific areas and encourage them to read it further offline.

Note that there is also a more detailed paper covering this topic.

#### ***Materials: Developing ResilienceBuilder – a research-based approach.***

Share the document on the screen and highlight the following key areas:

- Page 5 - Research and Development Structure steps (self-explanatory). Highlight the fact that we also researched the most impactful types of intervention (training) when it comes to resilience to build it into our approach and methodology.
- Page 6 – Academic Research. Talk briefly about the approach we took and the research databases we used.
- Page 7 – Factors Influencing Individual Resilience. These were the areas that our research indicated were significant factors relating to resilience, combined with areas derived from practical experience.
- Page 8 & 9 – Review of Main Resilience Scales in Adult Population and Workplace. Part of the research involved a review of the existing scales many of which have been used in the medical profession in relation to trauma. Fewer workplace resilience scales exist, and these tend to focus on some aspects of resilience rather than a holistic approach.
- Page 10 – The ResilienceBuilder Model. Emphasise the holistic approach to resilience, and based on our research we created 5 key facets; Mental Strength, Purpose, Physical Stamina, Emotional Intelligence and Social Support, and 30 sub-facets which provide a more granular view of resilience.
- Page 16 - Resilience Training is More Effective When the Causes of Low Resilience are Identified and Then Targeted.

It's important to show that the above research resulted in one of the key design principles of the ResilienceBuilder Assessment Tool and Report.

Our research showed that the most impactful training is when we can identify the specific areas associated with lower levels of resilience and target the training to those areas. This led us to develop the sub-facet concept and through the Assessment Tool and Report identify potential areas for improvement.

## **Return to the *Materials*: ResilienceBuilder Certification for Coaches and Facilitators Session 1 Final 24**

### **Slide 5 – ResilienceBuilder Overview and Flow**

- Explain the flow in terms of it starts with the ResilienceBuilder Assessment Tool which generates a personalised report confidential to the individual.
- For teams or groups, data is anonymised and analysed to highlight common challenges.
- ResilienceBuilder can be used for 1:1 coaching and group/team workshops.

### **Slide 6 – The ResilienceBuilder Model**

- Explain the model at a high level and walk through each facet giving examples in each area.
- ResilienceBuilder will provide an overall resilience score and a score for each of the 5 facets in the Assessment Report.

## Slides 8, 10, 12, 14, 16 – The sub-facets.

- Taking each of the facets in turn, e.g. Mental Strength, explain briefly each of the sub-facets.
- Highlight that these are the factors associated with resilient people and these are all tested through the questions in the Assessment tool to determine if this is a strength or a development area for each individual.
- ***Also reference the two sample Assessment reports and in particular the 'Emerging' report which provide an explanation of each of the sub-facets.***

Some clarifications for some of the sub-facets are below.

### Slide 8 – Mental Strength

- **Prioritisation** – People are effective at prioritising their work.
- **Avoiding Procrastination** – people who don't put off important work or delay making decisions.
- **Managing perfectionism** – people who can balance the need for quality with delivering on time, good is good enough.
- **Self-confidence** – people who are confident in their general abilities and skills.
- **Self-efficacy** – people who are confident they will succeed in a specific role or task.
- **Focusing on things** you can control – people who focus just on the things they can control/influence rather than being distracted by things outside their control.

### Slide 10 – Purpose

- **Having a clear life direction** – People who have a clear direction which may be life related, or career related. A 'north star', something they are working towards.
- **Identifying Clear Goals** – people with a clear understanding of the steps required to reach their objective.
- **Strengths** – people who have a clear understanding of their strengths and leverage them in their work.
- **Understanding your core values** – people who can identify their core values and apply them in their life, at work and at home.

### Slide 12 – Physical Stamina

- **Separating work from home** – people who have set boundaries between their work and home life, made more difficult since the pandemic where many people are now spending more time working from home.
- **Ability to relax and recharge** – people who can mentally switch off from work when they have downtime.

### Slide 14 – Emotional Intelligence

- **Managing Emotions** – people who have the ability to control their emotions even in the most difficult situations.
- **Managing Conflict** – people who address potential areas of conflict early on rather than avoiding them or allowing them to develop further.
- **Recognising Stress Triggers** – understanding the things that cause stress and being able to mitigate or avoid the problem developing further.
- **Seeking Feedback** – people who actively seek feedback and use the feedback as a learning opportunity without become defensive.

## Slide 16 – Social Support

- **An Established Support Network** – people who a strong network of family, friends and colleagues. Research shows that people with a close relationship with immediate family members have higher levels of resilience than those that don't.
- **A mentor/coach** – having a mentor or coach to help guide you on your journey.

## Slides 18-32 ResilienceBuilder Assessment Tool & Report

- This section provides an overview of the ResilienceBuilder Assessment Tool and Report.
- Explain the notes in the slide deck to highlight specific points as you walk through.

## Slide 18 – ResilienceBuilder Assessment Tool and Report

- The Assessment Tool has 49 questions and should take between 5 and 10 minutes to complete.
- The Assessment Tool can be accessed via a PC, laptop, tablet or mobile device.
- The platform generates a personalised report based on the answers given in the Assessment highlighting your overall level of resilience, your relative scores for each of the five facets, and providing specific recommendations for personal development.

## Slides 19-32 - ResilienceBuilder Assessment Tool & Report

- Explain the notes in the slide deck to highlight specific points as you walk through.

## Slides 33-40 - 1:1 Coaching.

- This section explains how to use the ResilienceBuilder report in a 1:1 coaching environment.
- Identify what coaching experience/qualification the coachee has and adapt the level of detail according to the experience of the coach.
- Refer to the Assessment Report as a diagnostic tool to help the coach and coachee during the 'discovery' phase of a coaching engagement.
- Explain the notes in the slide deck to highlight specific points as you walk through.
- Emphasise the importance of changing habits using the materials on slide 37 and 38.

## Slide 41 – Target Market

- ResilienceBuilder can be used in all sizes of organisations and sectors.
- Designed with the workplace in mind but covering life as well as work related areas.
- Explore with the coachee how they plan to use ResilienceBuilder.
  - 1:1 coaching or group team workshops
  - Sectors/Companies they will target.
  - How will they market the offering.

## Slide 42 – Positioning Resilience Builder

- Explore these topics with the coachee:
  - Stress, burnout and well-being are highly topical subjects and there is so much change in the world which impact us all on a daily basis.
  - Companies need to place greater emphasis on the well-being of their people with a positive impact on productivity, reduced long term sickness, unplanned attrition and burnout.
- To make lasting change, organisations, not just individuals need to recognise the importance of the well-being of their people rather than just pay 'lip service' to the topic.

### **Slide 43 – Creating the Environment for People to Thrive**

- Explain that the approach to building resilience is not just the responsibility of the individuals. Teams, leaders and organisations all have a part to play.
- Explain the model as 4 different levels to drive change:
  - Individuals
  - Teams
  - Leaders
  - Organisations

### **Slide 44 – Driving Opportunities – Organisations**

Explain the process to building opportunities within an organisation.

- Start with a single Assessment/Report for the interested party (leader/sales enablement/HR etc). Don't forget you can request a free assessment for the leader to try.
- Build up to a team with a workshop.
- Extend through referrals to other teams and/or
- Position a programme (across the organisation or sector)
- Target organisations who really care for their people, with a focus on well-being

### **Slide 45 – Building Resilience Programme**

- Discuss a typical programme within an organisation using the ResilienceBuilder Assessment tool.
- Emphasise the need to identify other KPIs e.g. employee engagement, long term sickness, burnout, and unplanned attrition.
- Measure all KPIs and re-run the ResilienceBuilder Assessment Tool at the start and end of the programme.
- Discuss the outcomes the client is looking to achieve from the programme.

### **Slide 46 –ResilienceBuilder Benefits Overview**

- Discuss the individual and organisational benefits that arise from a ResilienceBuilder programme.

### **Slide 47 – Marketing materials**

- Discuss the marketing materials that are available to the coachee.
- Website – good reference point for potential clients to go.
- Individual and Team flyers – can be personalised for the coachee on request.
- LinkedIn Company Page.
- LinkedIn Personal Page – Steve Howe, Founder ResilienceBuilder.
- ResilienceBuilder Assessment tool and Report – encourage coachees to offer 'free' trials to a leader who is interested in running it across their team or organisation.

## 5. ResilienceBuilder Certification Training Session 2 Guidance Notes

---

### **Session 2 Materials:**

- *ResilienceBuilder Certification for Coaches and Facilitators Session 2 Final 24*
  - *ResilienceBuilder - Group Workshop slides Final 24*
  - *ResilienceBuilder Facilitator Guide Final 24*
- 

### **Preparation**

Prior to session 2, the coachee will receive a link to download the above materials. Make sure that you have the documents to hand so that you can reference and share them during the training session.

Check that the coachee has downloaded the documents at the start of the session and briefly explain what they cover.

### **Materials: ResilienceBuilder Certification for Coaches and Facilitators Session 2 Final 24**

For Session 2 you will be using the above set of slides throughout the training together with the *Group Workshop Slides Final 24* and these guidance notes will follow the sequence of slides accordingly.

### **Slide 2 – Agenda**

Describe the focus of Session 2 which is predominantly around Group workshops, how to deliver them, data analysis and the sub-facet materials that are available to support you.

In this session, you will also cover Administration, Branding and Copyright.

### **Slide 3 – Session 1 Reflection**

Before starting to go through the content for Session 2, start off by asking the coachee to reflect on Session 1, what were their key takeaways, what questions have arisen since the session.

### **Slide 5 – Building Resilience Workshop Options & Format**

- Explain the different options for running a group workshop.
- Highlight the fact that the options differ to the extent of the amount of time available to deep dive on common challenges within the team.
- There is also the option to split the ½ day session into 2 x 2 hours.
- The coachee will find what works best from experience.
- Coachees may also want to add the Resilience workshop into one of their existing workshops e.g. High performing teams, by adding an extra ½ day to the workshop.
- Workshops can be delivered virtually or face to face to face.

### **Slides 6-9 – ResilienceBuilder Group Workshop Preparation**

- Explain the preparation required prior to a workshop.
- Key things to emphasise:

- Allow plenty of time for people to complete the Assessment. The bigger the group, the longer it takes.
- Give a deadline for completion allowing time for the analysis of data to be completed and sent prior to the workshop. (Ideally allow 5 working days).
- Send reminders or ask the group leader to remind their team to complete the Assessment by the deadline.
- Coachee will receive an update of completions so they can chase non-respondents.

## Slide 10 – Group Workshop Content

Open the Group workshop slide-set and facilitator guide as below.

### Materials:

- *ResilienceBuilder - Group Workshop slides Final 24*
- *ResilienceBuilder Facilitator Guide Final 24*
- Explain to the coachee that the Group workshop slide-set is a library of slides that they would be able to draw from when delivering a workshop.
- Also reference the Facilitator Guide which is available as a reference document to help coachees/facilitators when delivering a group workshop.

## Group Workshop Final 24 Slides

### Introduction

As part of your introduction, we recommend that the coachee sets the scene for the workshop as follows.

- Brief thank you from the Group/Team Leader to attendees for joining the workshop
- Brief personal introduction from the facilitator (avoid a long step by step CV!). Explain why this topic is important to you? Perhaps a personal story related to the topic.
- Outline the workshop objectives/desired outcomes.
- Share the agenda and approximate timings for lunch, coffee etc.
- Remind everyone of the housekeeping rules.
  - Turn laptops and phones off, you won't need them.
  - There will be regular breaks with time to make calls and catch up on emails.
  - Be prompt when coming back after the break.
- Give guidance on how to get the most out of the session as follows.
  - Confirm to everyone that this is a big investment in terms of time and money by their organisation and as a result they should seize the opportunity.
  - Confirm that everything that is discussed in the workshop is confidential and for the benefit of this team and that all reports are confidential to the individual and not shared.
  - Stress that this is a safe environment where everyone is encouraged to speak openly without fear of criticism or ridicule.

- With this in mind, encourage everyone to take a step out of their comfort zone and share their thoughts.
- Signal to the group that everyone has a voice and encourage the quieter ones to speak up, and the louder ones to make space for everyone to give their point of view.

### **Slide 2 – Workshop Agenda**

- This is a sample agenda for use in a group workshop.
- Explain that we begin with providing an overview of the subject of resilience before looking at the group data and working on some of the common challenges.

### **Slides 3 & 4 – Workshop Objectives and Outcome**

- Explain that some organisations prefer to talk about objectives, other outcomes so we have provided two different versions of the same material.
- Encourage the facilitator to share their own story when they kick off the workshop. Why is the topic important to them.
- Coachee/facilitator may ask each workshop attendee what they are looking to get from the workshop as a roundtable introduction.

### **Slide 3: Workshop Objectives**

When kicking off the ResilienceBuilder Group Workshop, it is important to outline the objectives of the workshop to set expectations across the group.

The key objectives are as follows.

- Raise the level of awareness on the topic of stress, burnout and resilience by discussing it openly with the group/team.
- Building trust in a safe environment.
- Provide a common understanding of the importance of resilience and the characteristics of highly resilient people.
- Understand the level of stress and burnout across the team and the key drivers.
- Understand the common strengths and challenges across the team when building resilience.
- Identify at a team level, one or more common areas to work on together to improve resilience.
- At an individual level, gain commitment to working on developing one or more recommendations from their personalised resilience report.

### **Slide 4: Workshop Outcomes**

The key desired outcomes from the workshop are as follows.

- All individuals will have a clear indication of their current level of resilience together with some recommended areas for further development.
- The Group/team will have a common understanding of the common strengths and challenges across the group in terms of resilience.
- Each individual will commit to working on at least one development area to build their resilience.

- The Group will commit to working on at least one common challenge area to help them become more resilient collectively.
- Overall, the desired outcome is for the team to become more resilient individually and collectively and therefore be better equipped to cope with adversity, stress and challenges more effectively.

### Slide 5 – 9 Resilience overview

- Explain that the first part of the workshop is intended to be highly interactive and educational on the topic of resilience.
- The slides are designed in such a way to ask a question before revealing the content.

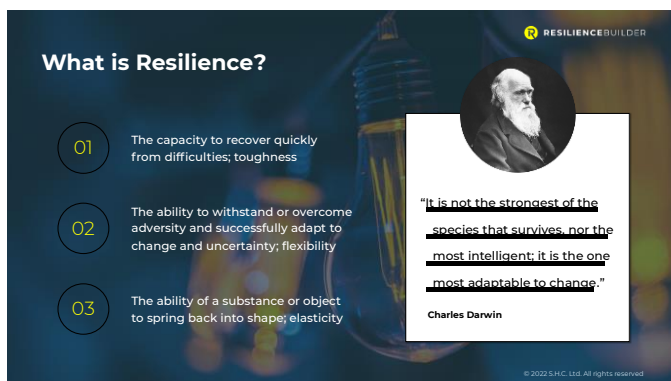

### Slide 5; What is Resilience?

**Question: Ask the group to define ‘resilience’.**

- Write their answers on a whiteboard or flipchart or if virtual, on a slide.
- Make sure you get a variety of inputs from across the group.

**Question (optional); Ask them to think of something or someone that epitomises resilience.**

**Reveal:** Now reveal the rest of the slide which are some typical definitions of resilience including the scientific definition (last one).

### Slide 6: Building Resilience

**Question: Ask the group whether we are resilient when we are born?**

**Question: How is resilience developed further?**

**Reveal** the rest of the slide showing that we are born with a level of resilience. And that resilience can only be built when we experience setbacks and challenges.

**Comment:** When we avoid difficult situations, we miss the opportunity to learn and the ability to cope with future adversity.

**Comment:** Offer the analogy of the parent who wraps their child in ‘cotton wool’ to protect them from the outside world. By doing this they are likely to be impacting the child’s ability to cope with adversity later on in life.

## Slide 7: Why is Resilience Important?

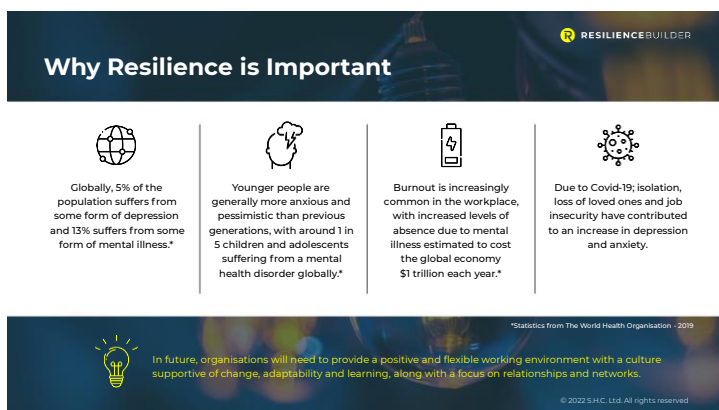

### Question; Why is Resilience Important?

Ask the group for a variety of perspectives on why resilience is important in today's world.

**Reveal:** Here are 4 key areas that make resilience so important today.

- Increase in mental health issues globally.
- Increase in stress and anxiety among younger generations.
- Impact of stress and burnout in the workplace
- Impact of covid-19 pandemic and global challenges – economic, conflict, climate etc

**Discuss a couple of the areas and get people's perspectives.**

### Explain:

We need to help individuals and teams become more resilient and better able to cope with the increasing level of change, adversity and stress in the workplace.

So, let's think about what makes a person resilient?

## **Slide 8: What do you think are the key characteristics of a highly resilient person? (Blank)**

**Question: What do you think are characteristics of a highly resilient person?**

Write them on a whiteboard or add to the blank slide.

## **Slide 9: What makes a Person Resilient?**

Begin by talking about the extensive research that went into identifying the most common characteristics of highly resilient people. Academic research, including a detailed understanding of the 'resilience scales' that are already out there, together with personal experience of the founder over 30 years of senior leadership.

Summarise the finding as below on the slide. E.g.

'Highly resilient people tend to be positive, highly adaptable to change and never give up and are able to manage stress effectively.

They tend to have a clear purpose and direction and goals to help them get there.

Healthy eating, regular exercise and a good work/life balance are also correlated with highly resilient people.

Resilient people tend to be self-aware, with high levels of self-esteem and are able to manage their emotions.

They also have a strong network of family, friends and colleagues and a coach/mentor to support them on their journey.

**What Makes a Person Resilient**

According to various resilience scales and research, the most common characteristics possessed by highly resilient people are:

- Optimism, adaptability and persistence, with the ability to manage stress effectively.
- A sense of purpose and meaning to their lives, with clear goals aligned to their personal values.
- Taking care of themselves through healthy eating, regular exercise, restful sleep and a good work/life balance.
- High levels of self-awareness, self-efficacy and self-esteem, with the ability to manage their emotions.
- A highly supportive network of family, friends and colleagues – people they can trust and confide in when things get tough.

What do you think are the key characteristics of a highly resilient person?

© 2022 S.H.C. Ltd. All rights reserved

## **Slides 10 – 27 Workshop Slides**

- These slides you will have covered in Session 1 so you will only need to walk through them again relatively quickly, starting with an explanation of the model, the report structure, an overview of the sub-facets, the 4-level approach and the importance of changing habits.

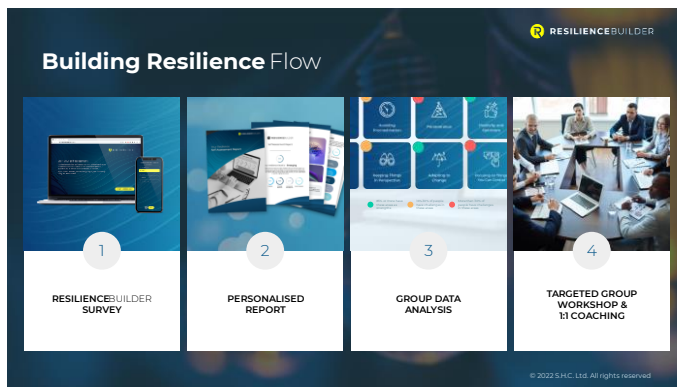

## **Slide 10: The ResilienceBuilder Model**

The ResilienceBuilder model aims to synthesize the vast amount of research that has been done on the topic of resilience into a simple but powerful model. The model identifies 5 key areas of resilience: mental strength, purpose, physical stamina, emotional intelligence and social support.

## Slide 11: Building Resilience Flow

It all starts with the Online ResilienceBuilder Assessment Tool, accessible via a mobile phone or laptop. There are approximately 49 questions whereby the respondent is asked to select one of five options; Strongly Agree/Agree/Neutral/Disagree/Strongly Disagree.

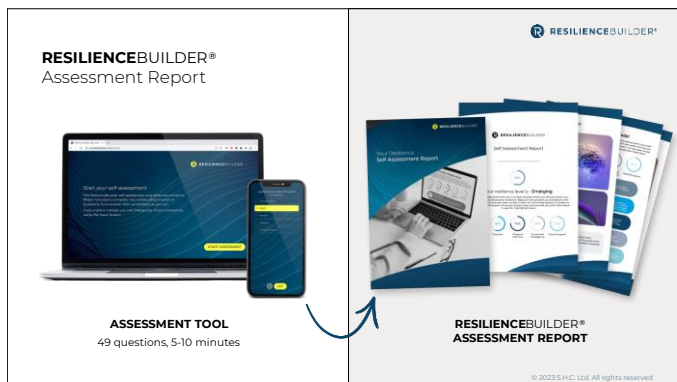

Once completed, a personalised report is generated and sent to the respondent. This may be done before the workshop itself or straight after the workshop has finished.

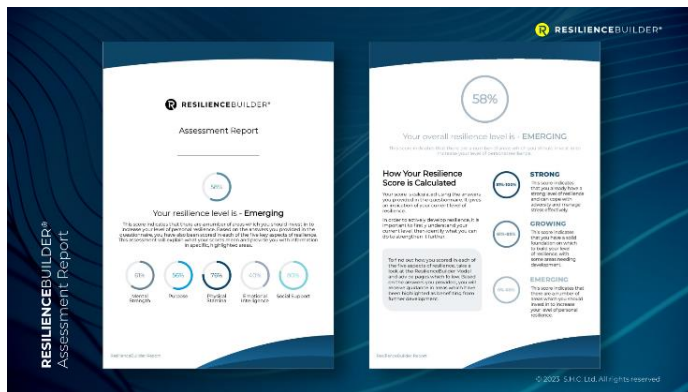

I generally send them out following the workshop to ensure that people are focused on the discussion rather than reading their own report, but you may want to try different formats depending on the duration of the workshop.

**Tip: Emphasise that the personalised report is confidential to the individual and will not be shared with anyone else.**

**Explain that the data is then anonymised for use in the group workshop to identify challenges that are common to the team.**

## Slides 12 & 13: ResilienceBuilder Assessment Report

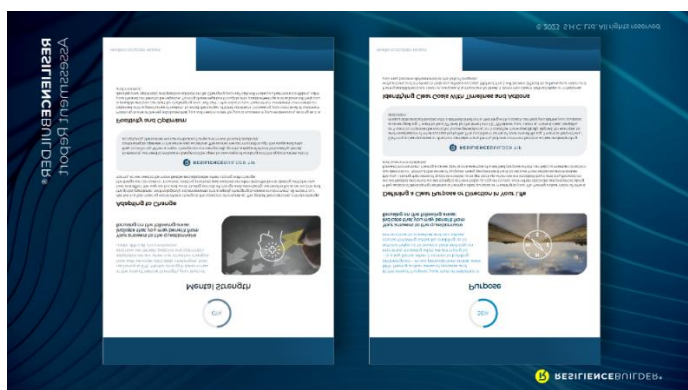

**Explain how the ResilienceBuilder Assessment report works** by guiding them through the report as follows.

- **Page 2** of the report (see above image) provides the respondent with their overall level of Resilience, expressed as a % and labelled as **Strong/Growing/Emerging**.
- Beneath that are the 5 facets: Mental Strength/Purpose/Physical Stamina/Emotional Intelligence/Social Support with a % score for each area.
- **Note:** The main purpose of the % scores are to provide a relative view of each facet when compared to another. In this way the respondent can quickly see which facets are the strongest and which may require further development.
- **Page 3** of the report provides an explanation of the levels of Resilience; Strong/Growing/Emerging.

#### Slide 14: Resilience Assessment report – Facet and sub-facet details

Now explain how the report provides details and recommendations for each of the facet areas; Mental Strength/Purpose/Physical Stamina/Emotional Intelligence/Social Support.

On the left-hand side of the report, you can see the page relating to Mental Strength. Here you can see that there are two recommendations for development within Mental Strength for the respondent; Adapting to Change and Positivity and Optimism.

Each recommendation is explained, and a tip is given to help people get started on their development journey.

The idea behind this is to help people identify potential areas for building resilience and to encourage them to take the next step in terms of self-learning or 1:1 coaching.

**Note:** The recommendations provided in the personalised assessment report are based on the answers given in the Assessment tool by the respondent. These are purely

recommendations, and it may be the case that the respondent does not recognise that they need further development in a specific area.

In a 1:1 coaching session (or via email when I send out the report) I usually begin by asking if the recommendations resonated with the individual. In that way we can identify any areas that may not need further development or discussion and enable them to focus on the key areas.

## Facets and Sub Facets

Within each of the 5 facets of resilience; Mental Strength/Purpose/Physical Stamina/Emotional Intelligence/Social Support, there are sub-facets or recommendations that can be triggered according to the responses given in the Assessment tool.

In total there are 30 recommendations/sub-facets that may be triggered in the personalised Assessment report.

### Slide 16-24: Sub-facets overview.

**Note: you will have covered the sub-facets in session 1 so you shouldn't need to go back through them with the coachee.**

### Slide 25: Creating the Environment for People to Thrive

**To help people build resilience enabling them to cope with stress and adversity and to avoid burnout we need to focus on 4 different levels.**

- What can we do as an organisation to address the environmental/cultural issues that are impacting people and teams?
- What can we do as leaders?
- What can we do as a team to collectively become more resilient?
- What can we do individually to build our personal resilience?

This is where you need to make the connection between the issue of stress, burnout and performance as being the responsibility of the organisation, the team and the individual.

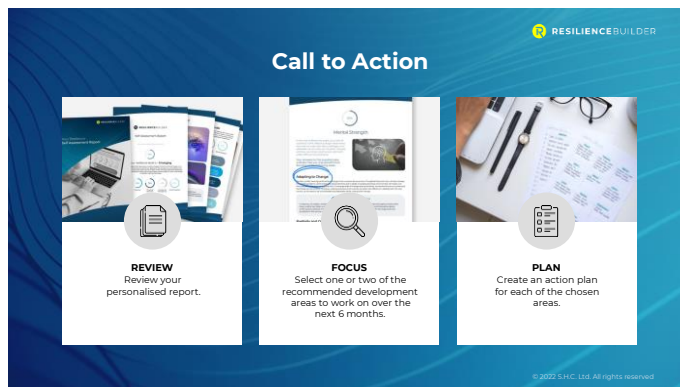

### Slide 26 & 27: Changing Habits

**This will have been covered in Session 1.**

### Slides 28 – 30 Individual Call to Action and Personal Development Report

- Explain that these slides are to encourage individuals to review their Personalised Assessment and using the Personal Development Resilience Plan to select 1-2 areas to work on individually.

## Slide 28 & 29: Call to action individuals.

**Explain;** ‘Following the workshop you will receive your personalised ResilienceBuilder report’ or where you sent the reports out in advance, ‘you have already received your personalised report.’ Now walk them through the call to action.

- **Review** your personalised report and understand the recommendations that have been made for developing your resilience.
- **Focus** by selecting 1 or 2 areas to work on over the next 6 months.
- **Plan** – build an action plan for each of the areas that you select to work on.
- **Seek help** – through 1:1 coaching or self-learning by using the detailed sub-facet materials.
- **Share your experiences** with friends and colleagues. What did you do differently? How did you create a new habit. What was the outcome?
- **Follow up** – In 6 -12 months do the Assessment tool again and review progress.

## Slide 30: Personal Resilience Development Plan

Reference the ResilienceBuilder Personal Development Plan at the back of the Assessment Report, also available digitally.

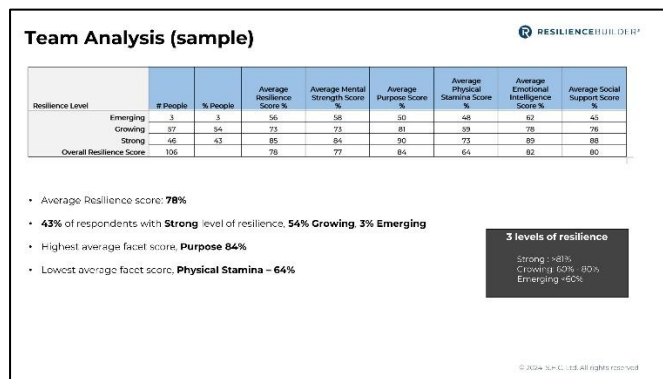

## Slide 31: Data Insights from Group Results

The recommended approach is to begin by presenting the high-level results at a team/group level. Stress that the individual data has been anonymised and make sure that no one can be identified from the data in this section.

Explain the table below in terms of overall resilience level, % people in each level of resilience (Strong/Growing/Emerging), average facet % scores. Highlight strongest and weakest facet scores as a team.

**Explain:** This is a high-level summary, and we need to go deeper to understand the group dynamics.

### Slide 32: Stress v Performance Curve

In the Assessment Tool are three questions relating to the Stress v Performance curve.

Begin by explaining the graph as follows.

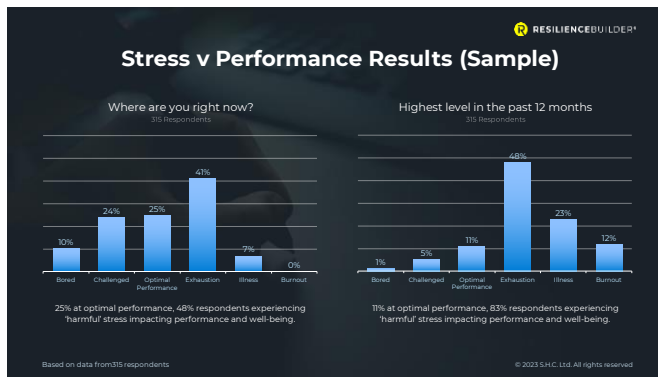

‘We are now going to look at the relationship between stress and performance. Performance is shown on the vertical axis, stress on the horizontal axis.

We all need a level of pressure and stress to reach our optimal level of performance as you can see in the middle zone of the graph. Without that we may become bored, although it is unlikely in today’s fast paced world!

But as the levels of stress and pressure increase and become consistent and constant, our performance is impacted, and we move into the exhaustion phase. If this continues for an extended period it can lead to illness and short-term absence from work. But if this level of stress continues forward, it can lead to breakdown and burnout which is defined as an extended absence from work.’

### Slide 34: Stress v Performance Results

Now present the results showing graphs side by side (example below).

**Question: What observations would you like to make about the results relating to the first graph, 'Where are you now?'**

Note: Make an observation about the % of people in the 'optimal performance zone'. From experience it's typically less than 33% of the total team, so plenty of room for improvement in effectiveness.

Now share the results from the second question.

**Question: What observations would you like to make about the results from the second question – the highest number you have been in the last 12 months.?**

Note: Make an observation about the % of the team in the 'optimal performance zone' and the % of people in the 'harmful stress' area of exhaustion/illness/burnout.

Ask if the team are surprised by this.

**Slide (Add-in Optional) Feedback from other Teams on Stress v Performance results**

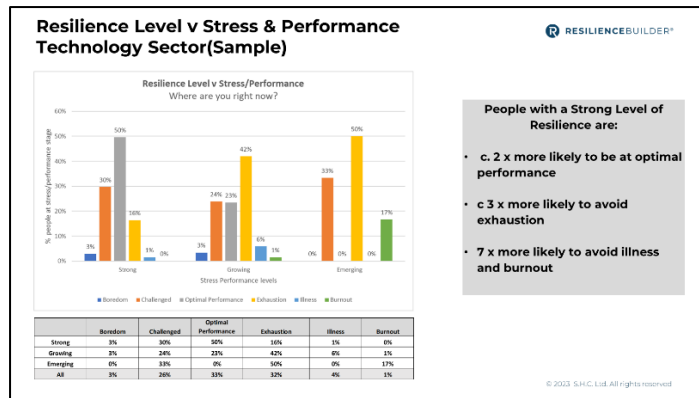

Where you have run workshops for other teams in the same company, you may wish to share the collective results and compare them to this team to identify any key differences.

**Slide 35: Combining Stress v Performance and Resilience Levels**

If you combine the data from Stress v Performance and Resilience Levels, we can look at the inter-relationships between the two areas. For example, we can see below that people with Strong levels of resilience are 2 x more likely to be working at optimal performance and 3 times less likely to be suffering from exhaustion than those in the Growing level of resilience.

**Note: For lower samples of data, the distribution may not materialise in this way**

## Presenting Group sub-facet Results

Explain that there are two ways of presenting Group data. One is based on providing the actual data, the other is based on using a visual approach which shows the relative importance of each area.

### Data Based approach.

Prior to the workshop you will need to prepare the Group Results slide based on the group data analytics provided. For each of the facets: Mental Strength, Purpose, Physical Stamina, Emotional Intelligence, Social Support you will receive the data showing the following.

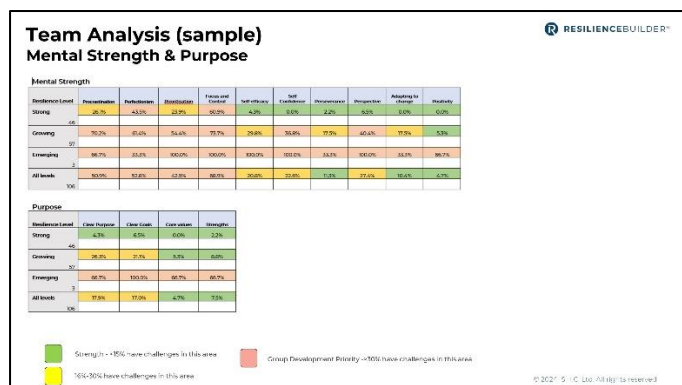

- The common strengths across the group/team
- The common challenges across the group team.

Each sub-facet is characterised as follows.

- 85% or more** have these areas as **strengths**.
- 16%-30%** of people have **challenges** in these areas.
- More than 30%** of people have **challenges** in these areas.

For the specific group/team that you are working with, add the results to the Results slide for each of the facets in the format provided. An example is provided below.

## Slide 36 – 38 Team Analysis

Note: Don't forget to emphasise that these are the collective group/team results, and the Green sub-facets represent those sub facets where the majority of the team are Strong.

The Red sub-facets represent where more than 30% of the team have potential challenges.

Walk through each of the facets in turn and drive a discussion to understand how the team feel about the results and potential root causes.

**Question:** what's driving the results in a particular sub-facet? Are there any major surprises? We will be asking them to choose a couple of areas to deep dive on later in the workshop.

**Question:** Which areas could be most impactful for the Group/team if we could address them?

Point out that some areas may be inter-related for example, high levels of perfectionism may be impacting procrastination.

**Repeat** for Mental Strength, Purpose, Physical Stamina, Emotional Intelligence, Social Support

**Record** on a whiteboard or table some of the priority areas that the team identify as important as you go along. These will be areas that they may choose to work through during the workshop.

### Slide 39 Comments Analysis

**Explain the importance of the comments when it comes to understanding some of the key challenges and dynamics within a team.**

**Analyse the comments prior to the workshop and identify common themes.**

Discuss the 'comments' as a group to begin to identify some of the key drivers.

Comments Analysis (sample)
R RESILIENCEBUILDER®

Themes

- High Workload
- Lack of time to focus on key issues
- Lack of resources
- Slow pace of change
- Ambiguity, lack of clarity on objectives
- Team ego's/ politics
- Unreasonable expectations

© 2024 S.H.C. Ltd. All rights reserved

### Slides 42 – 50: Alternative Approach to Presenting sub-facet Results.

Alternatively, using the data analytics that you will receive, you may prefer to present a higher level of data which provides the audience with a visually impactful overview of common areas of strength and weakness. (see below).

Add animation so that the Strengths (Green) appear first, then the Yellows, then the Reds.

## Slide 51: Summary of Focus Areas for Intervention

Prior to the workshop, you may wish to make a summary of the key areas that were impacted across the team; All levels of resilience and Growing/Emerging levels. This will help determine which areas to focus on as part of the intervention.

| Key Findings<br>Focus Areas for Intervention |                                                                                                                                                                                     |                                                                                |                                                                                                                                |                                                                                              |                     |
|----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------|---------------------|
| Group                                        | Mental Strength                                                                                                                                                                     | Purpose                                                                        | Physical Stamina                                                                                                               | EQ                                                                                           | Social Support      |
| All Resilience Levels                        | <ul style="list-style-type: none"> <li>Procrastination</li> <li>Perfectionism</li> <li>Focus on things you can control</li> </ul>                                                   | -                                                                              | <ul style="list-style-type: none"> <li>Time to relax and recharge</li> <li>Work/life balance</li> <li>Quality sleep</li> </ul> | <ul style="list-style-type: none"> <li>Asking for help</li> <li>Managing conflict</li> </ul> | Mentor/Coach        |

## Slide 52: The 5 major causes of Burnout

This can be an interesting slide to share in a situation where there are higher levels of exhaustion, stress and burnout and where the comments and workshop feedback indicate that some of the root causes are:

- Unfair treatment at work
- Unmanageable workload
- Lack of role clarity
- Lack of communication and support from managers
- Unreasonable time pressure

This should be used to highlight that these issues need to be addressed or there is a significant risk of higher levels of burnout across the team.

**Return to: ResilienceBuilder Certification for Coaches and Facilitators Session 2 Final 24**

## Slide 26 Selecting the Areas for the Group/Team Deep Dive

**Explain some of the approaches to selecting areas for the team deep dive.**

Having gone through the results for all 5 facets and their respective sub-facets, you now need to decide with the team, which areas to prioritise for a deeper dive discussion. The

number of areas to select will depend on the amount of time you have allocated for the workshop overall. Typically, I would recommend the following.

½ day workshop      1 – 2 areas for deep dive

1 day workshop      3 areas to deep dive

2-day workshop      4 - 5 areas to deep dive

You can approach this in a number of ways.

- Give each group/team member x votes (x = # of areas for deep dive).
- Discuss with the group, which areas would be most impactful to the team's effectiveness and wellbeing if they could be addressed and prioritise.
- Select 1 area from each facet and prioritise (although we tend to see more challenges in Mental Strength and Physical Stamina from previous experience).

### **Deep Dive on Selected areas**

Once the group/team have decided on the selected area(s), you will need to decide how to approach the Deep dive session. Depending on the number of people in the workshop, you may wish to adopt one of the following approaches.

- Everyone discusses the same focus area, together.
- Everyone discusses the same focus area but split into 2 or more groups.
- The Group is split, and each group is asked to address different focus areas.

### **Slide 29: Sub-Facet Materials**

Explain that the sub-facet materials are available for all 30 ResilienceBuilder sub-facets and follow a similar structure:

- Group/Individual discussion on the specific area to have a common understanding of the problem statement and the impact on the group/team.
- Sharing best practice from the team and from the sub-facet materials.
- Group discussion to agree some practical approaches with clear actions that can be implemented across the team.
- Exercises for teams and individuals to follow. (where available)

### **Walk through some of these highlighting the different materials and exercises.**

Explain that these can be used for 1:1 coaching or in Group workshops.

### **Slide 31: Summary of Group/Team Actions**

At the end of the workshop, make sure that the agreed group/team actions are summarised, and owners agreed. Encourage the team to check in on a regular basis to measure the impact of the changes they have made as a team.

It can be powerful to approach it in the following way.

- 3 levels – Company/Group or Team/Individuals
  - Company – What support do we need from the broader organisation (feedback).
  - Group/team – What actions are we going to take collectively as a team?
  - Individuals – What actions am I going to take going forward?

### Slide 31: Individual ResilienceBuilder Personal Development Plan

For one day and two-day workshops, I would recommend sending individuals their personalised assessment report at lunchtime for a 1-day workshop and at the end of day 1 for a 2-day workshop.

You can then incorporate some time in the agenda for individuals to develop their own Personal Development Plan by selecting one or two areas to work on themselves.

Give everyone 30 minutes to decide which recommended area to work on and ask them to complete the relevant sections of the ResilienceBuilder Personal Development Plan for 1 area.

Then in pairs, in groups, or all together, depending on the size of the group/team, ask for volunteers to share their thinking in terms of.

- Which recommended area are they committing to work on.
- What is the current situation?
- What impact does that have on them and others?
- What specifically are they going to do differently?
- What help do they need?
- How will they measure success?

### Slide 33: Follow on activities for clients

Explain the different types of follow on activities that can be offered following a workshop:

- **Monthly check in** with the group to check progress.
- Add-on **group sessions** to deep dive in other critical areas
- **1:1 Coaching** programme for team members with lower levels of resilience
- **Webinars** on specific topics targeting people with challenges in specific areas e.g. perfectionism, nutrition.
- Promotion of existing and new **wellbeing programmes** across the organisation
- ResilienceBuilder Assessment for **new joiners** on the team
- ResilienceBuilder **2<sup>nd</sup> Assessment** in 6-12 months

### Slides 35 – 37 Administration

Following the materials, explain the process for requesting Assessments and links.

- Emphasise the need to allow 2-3 weeks' time prior to the workshop to allow for people to complete the Assessment and to receive the analysis.
- Completed reports may be sent directly to the respondent or to the coach/facilitator.
- Group analytics will be sent to the facilitator.
- Report fees are as outlined in the Coaching Agreement or agreed from time to time for a particular client.
- Payment is available via bank transfer or credit/debit card payment.

### **Slide 38 – ResilienceBuilder Certification Virtual Badge**

Explain that on completion of the certification, they will receive an email outlining the process to download their digital badge onto LinkedIn, both as a post and as part of their licences and credentials section.

### **Slide 40 – Branding Trademarks and Copyright**

Explain that the ResilienceBuilder branding is available for them to use in materials, websites, social media etc.

- A Branding guide will be provided.
- ResilienceBuilder has been registered as a trademark in the UK, EU and is in progress in the United States
- Please make sure you use copyright statements when using the materials.
- Do not copy or forward the materials to people who are not certified ResilienceBuilder coaches.

### **Close**

At the end of session 2, confirm the following.

- You are now a certified ResilienceBuilder coach.
- Materials will be sent to you for download over the next few days.
- Recommend that they identify some initial clients for coaching or workshops whilst the training is still fresh.
- Reach out at any time for help, and questions.
- ResilienceBuilder Founder is happy to support you with sales calls where required.
