

EXERCISE 1

The Eisenhower Matrix

Use the Eisenhower Matrix provided to Categorise Your Tasks

1. Break up your workload into tasks, including those that need to be done today and in the coming weeks and months.
2. Assign those tasks into one of the 4 quadrants described below:
 - Tasks in the 'urgent and important' category are your priority.
 - Tasks in the 'important but not urgent' quadrant need to be scheduled to avoid them moving into the urgent/important quadrant. They often have the greatest payout because, though they require more time, they get you closer to your goals.
 - Tasks that are urgent, but do not contribute towards your goals, are not important to you and should be delegated.
 - Eliminate time-wasting tasks done to avoid the urgent and important tasks. It might feel like you're doing a lot, but what you're doing is not productive. Ask yourself, "Does this help me reach my goals?"

EXERCISE 2

Block Time Using The Eisenhower Matrix

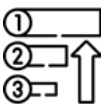

Using your Eisenhower Matrix from exercise 1, time-block a working day, either in your calendar (example below), or using a time-blocking app – Sunsama has a 14-day free trial, or TickTick has a free version.

Plan your day ideally the night before or first thing in the morning.

Wherever possible, break tasks into sub-tasks which can be completed in one sitting.

Tasks in the category, 'Do First - important and urgent,' should be your first priority.

Examples include: urgent deadlines, acute problems, urgent enquiries, projects with deadlines, slides for meeting, addressing customer issues.

Schedule time to work on important tasks when you are most alert and able to focus. For many people this is around 10.00-14.00.

Tasks in the category, 'Schedule - important, not urgent,' should be scheduled beginning with those which provide the largest payout, i.e. your '20% tasks' which you tend to get 80% of your results from (Pareto Principle).

Examples include: project planning, process development, further training, HR, competitor analysis, mentoring staff, networking event.

Limit the number of tasks you plan to do each day; 1 large, 3 medium and 5 small (the 1-3-5 rule).

Address the other 2 categories; 'Delegate' and 'Eliminate'. Spend time each day delegating tasks and also deleting tasks.

Examples of task you may delegate: invoice paying, administrative tasks, tasks that do not contribute to your goals. You may delete: unnecessary meetings.
