

EXERCISE 3

Using The 1-3-5 Method to Categorise Your Weekly Tasks

1

Once you've sorted out your tasks for the week you can start to categorise them.

2

Make columns to rearrange each task, or simply label them next to each item on your list.

3

As a rule-of-thumb consider a Major task one that takes 2-3 hours, a Medium task ~1 hour and a Small task ~30 minutes.

4

Consider the priority, size, and difficulty of your tasks and use previous experience of time taken on similar tasks, possibly from time-tracking data or from counting Pomodoros.

5

Implement this using a 1-3-5 app, incorporate into a time-blocking app, or use a notebook.

6

Tackle the Major task first then move on to the next most important task.
